PRODUCT OVERVIEW

USB CHARGING

Please charge your new device for at least 10 minutes to have it activated before initial use. Insert the charging plug of the host into the USB port for charging. Make sure the pins on the charging plug contact those in the USB port. In case that device is under low battery, connect the device host to an adapter for charging. Device will automatically boot up once charged. Remove the device host from the power supply once fully charged.
USB charger requirement: DC USB port (5V-500mA)
Charging time: 1-2hr(s)

INSTALL APP

Download "Puriffit2.0" APP for Android and IOS devices.
Option 1: Search for "Puriffit2.0" in APP store or Google Play and download to your smartphone.

Notes:

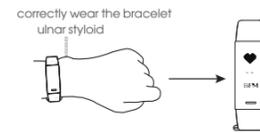

- This fitness tracker requires IOS 9.0 & above or Android 5.0 & above system.
- "Puriffit2.0" APP is only compatible with smartphones.

Then long press for 3 seconds to start running or other exercise. You can finish your exercise by long pressing the touch key.

HEART RATE MONITORING

Switch the bracelet to the screen of heart rate monitoring and wait for 3 seconds. When the heart icon jumps repeatedly and the heart rate LED lights up on the back of the bracelet, it indicates the start of the heart rate test. The current heart rate number will appear after 10 seconds, and the heart rate test will be quitted automatically. You can also test the heart rate, synchronize the test data and set up the automatic test of the heart rate by connecting the APP on your mobile phone.

REMINDER SETUP

Open the reminder and notification of the APR and open the corresponding access in the phone set-up, allow APP to visit phone call, message, Email, Facebook and Twitter, then the reminder of call and message can be achieved.

SYNCHRONIZING THE DATA

Firstly, connect the bracelet with your mobile phone, then pull-to-refresh on the main interface of APR and the date will be synchronized and the bracelet time will be corrected automatic. Date synchronized includes: steps, calorie, distance, sleep time, heart rate, etc After synchronizing successfully, you can check it in the main interface of APR The first synchronization will last for 1-2 minutes.

NOTES

1. The bracelet is not suggested to wear when taking a shower or swimming.
2. It is not allowed to replace the battery at random.
3. The bracelet must be charged by the build-in charging wire.
4. Please connect the bracelet when synchronizing the bracelet
5. Do not exposure the bracelet to the place of extreme high or low temperature for a long time.

MORE FUNCTIONS

Please download the APP to know and use more functions.

FAQs

- Failed to find the device when pairing**
- 1) Make sure the Bluetooth of your smartphone is ON.
 - 2) Make sure the distance between your smartphone and the fitness band is within 30cm.
 - 3) Make sure the "Puriffit 2.0" APP is trusted by your smartphone by going to your smartphone system Settings, finding "Puriffit 2.0" APP and enabling the Location and all Notifications (Specific setting methods may vary according to different smartphones)
 - 4) Make sure the fitness tracker is under unbind status before pairing.
 - 5) Open "Puriffit 2.0" APP on your smartphone and tap on "Device" → "Bind device", then your smartphone starts searching devices. Select "RS Wave" in the list of found devices, and tap on "RS Wave" to connect the device to your smartphone.
 - 6) If you failed search the device, reboot your smartphone and Bluetooth to search it again.

a) Go to your smartphone "Settings" → "Bluetooth". Under "MY DEVICES", find "RS Wave", tap on "Forget This Device" and turn off Bluetooth.
b) Reboot smartphone and open the "Puriffit 2.0" APP. When it asked whether to turn on the Bluetooth switch, click OK to search and bind your device.

Failed to charge the device

Make sure the direction of the device's USB plug is correct when plugging into the USB port for charging. Please remove the device host from the power supply once fully charged. Prolonged charging may shorten the battery's life.

Failed to receive SMS/Calls notifications

Calls/SMS notification function works when the device connects to your smartphone via APP. Please kindly refer to the following tips:
1) Go to your smartphone system Settings, find "Puriffit 2.0" APP and enable the Location and all Notifications (Specific setting methods may vary according to different smartphones)

- 2) Turn Bluetooth on and go to the "Puriffit 2.0" APP to bind the device.
- 3) Switch "Message Reminding" function on, and click "✓" to save your settings.

Failed to count steps accurately

Regarding the step counting, this fitness tracker has a built-in 3D sensor. It registers your steps when you swing your arm. Sometimes the data on device may displayed a little delayed. And it will reset itself if you walk continuously less than 40 steps. To test the accuracy of the pedometer, please walk casually and continuously up to 100 steps or more.

Failed to measure heart rate

Make sure the wrist band sit neatly on your wrist before use. Tap on the touch key to go to the heart rate mode and wait for 10-20s to detect the heart rate.

Failed to connect to the smartphone

The device will disconnect from your smartphone in the following cases:
1) Smartphone Bluetooth was off or exceed normal Bluetooth connection distance range. The normal Bluetooth connection distance is within 10 meters, it can easily be reduced by walls or furniture, etc.

- 2) The "Puriffit 2.0" APP was ended in phone background process. To reconnect the device to your smartphone, please kindly refer to the following tips:
1) Go to your smartphone system Settings, find "Puriffit 2.0" APP and enable the Location and all Notifications. (Specific setting methods may vary according to different smartphones)
- 2) Clear all running/background processes in your smartphone, go to "Puriffit 2.0" APP, and swipe down Mainpage, then the device will reconnect to your smartphone and refresh data. You can also restart you smartphone and Bluetooth, then rebind the device on APP.

Failed to sync your tracker data to APP

To sync your tracker data to "Puriffit 2.0" APP, go to "Puriffit 2.0" APP and swipe down Mainpage under connection state.
